

Superloon floor light

Jasper Morrison, 2015

Description

Superloon floor light by Jasper Morrison for Flos.

The Superloon floor light is inspired by the most elemental of lighting sources - the moon. A ring of LEDs set into the edge of a flat disc of translucent white PMMA generates a soft ambient light which may be adjusted in intensity and temperature as desired.

Jasper Morrison describes the evolution of his design: "A couple of years ago Piero Gandini showed me a new technology which consists of a ring of LEDs that send light sideways into the edge of a composite disc of translucent white material which, when lit, appears to be a flat white disc. Superloon is the answer to the question of what to do with this intriguing technology."

The diffuser is held in a gyroscopic axis that allows the light source to be rotated through 360° for optimum flexibility.

The supporting structure is a minimal aluminium frame available in white or black powder-coated or chrome-plated finish.

Light source:

Edge Lighting LED 2200/2800K 4000lm CRI80 - 45W

Dimensions:

72.3w x 197.2cmh

Diffuser: 75.4cm diameter

Product code

MIC-F66300*

Delivery

Made-to-order: 6-8 weeks

Price

£3,121.00
