

Magnetips pens

Typica, 2017

Description**Magnetips pens by [Typica](#).**

A Kickstarter-funded design, Magnetips are ingenious, refillable fine-line felt tip pens designed to revolutionise your doodling and drawing. Ideally suited to both detailed sketching and colouring in and certain to appeal to adults and children alike.

Each pen contains a pair of super-strong Neodymium magnets that ensure pens grip together. Use Magnetips' magnetic force to create complex constructions or simply to stop them rolling all over your desk.

Magnetips have a durable polypropylene body with a hexagon profile that makes each pen comfortable to hold. When the pen runs out the body can be unclipped to insert a new fine-line refill, making them a more environmentally friendly option than disposable felt tips.

Set of 20 fine-line pens with 0.4 nib. Water-based ink.

An optional set of 20 fine-liner refills may be purchased at the same time.
