Poul Henningsen, 1958

Description

PH 5 Mini pendant light by [Poul Henningsen](#) for [Louis Poulsen](#).

Ex-display item reduced by 30%

£660 -30% now £462

This item is a one-off clearance item to be sold on a first order, first served basis.

Rooted in a painstaking analysis of the reflective qualities of light, Poul Henningsen's [PH 5 light](#) is recognised as a classic of Danish design and is notable for its innovative glare-free form and uniform illumination.

Henningsen developed the PH 5 pendant light in 1958 in response to constant changes to the shape and size of incandescent bulbs by bulb manufacturers. Irrespective of how the light is installed or the light source used, the PH 5 is completely glare-free, as a result of Henningsen's ingenious three shade system. The light derives its name from the 50cm diameter of the shade. A reduced version of the original, the PH 5 Mini has a diameter of 30cm.

The shade and reflectors are made of spun aluminium, with rolled aluminium struts.

The PH 5 mini is available in copper and white. The copper version comes with a copper anti-glare disc inside. The copper surface is untreated. This changes the surfaces over time and develop a patina. The process may have already begun before the product gets delivered.

Supplied with ceiling cone and 3m white textile cable.

Light source: 1x40W E14 bulb (not included). IP 20 rating.

Dimensions:

Shade: 30dia x 16.3cmh
