This item is a one-off clearance item to be sold on a first order, first served basis.

Rooted in a painstaking analysis of the reflective qualities of light, Poul Henningsen's PH 5 light is recognised as a classic of Danish design and is notable for its innovative glare-free form and uniform illumination.

Henningsen developed the PH 5 pendant light in 1958 in response to constant changes to the shape and size of incandescent bulbs by bulb manufacturers. The light derives its name from the 50cm diameter of the shade. Irrespective of how the light is installed or the light source used, the PH 5 is completely glare-free, due to Henningsen's ingenious three-shade system.

The shade and reflectors are made of spun aluminium, with rolled aluminium struts.

The PH 5 mini is available in copper and white. The copper version comes with a copper anti-glare disc inside. The copper surface is untreated. This changes the surfaces over time and develop a patina. The process may have already begun before the product gets delivered.

Supplied with ceiling cone and 3m white textile cable. Max weight: 2.5kg

Light source: 1x200W E27 bulb (not included). IP 20 rating.

Dimensions:

Shade: 50dia x 28.5cmh
