

Raimond Zafu 75 pendant

Raimond Puts & OX-ID, 2009

Description

Raimond Zafu 75 pendant light by [Raimond Puts & OX-ID](#) for [Moooi](#).

The Raimond Zafu is the elliptical version of the Raimond pendant light manufactured by Moooi.

Dutch mathematics professor Raimond Puts (1937 - 2012) was passionate about searching for solutions to practical problems. His love for geometric shapes, engineering, and metalwork all came together when the LED technology was born, in the form of the iconic Raimond pendant light.

The Raimond range of sphere, dome, Zafu, and XL pendant lights demonstrate the perfect integration of functionality and beauty.

Raimond will always be remembered by Moooi as 'The man who brought the starry sky into our homes'.

Two years before his death, Raimond Puts won the best Woonproduct of 2010 Award (Sanoma Woon Awards) with the Raimond light.

Stainless steel structure acts to supply current to LED terminals.

Dimensions
75dia x 30cmh 5kg

Specifications
