

HAL Tube stackable

Jasper Morrison, 2011

Description

HAL Tube stackable by [Jasper Morrison](#) for [Vitra](#).

With HAL Jasper Morrison has created a reinterpretation of the multifunctional shell chair and a varied chair range with a distinctly contemporary appearance. The shape of HAL's shell ensures plenty of freedom of movement and the slightly flexible plastic makes many different sitting positions possible - even sideways and astride the chair.

HAL facilitates dynamic, ergonomic seating. The selection of bases and shell colours opens up a wide range of choices, ensuring HAL can be used in all kinds of environments - in the office, as well as in public spaces and in the home.

Stackable four-legged base of chromed tubular steel. Chairs may be stacked six-high on the floor, and up to 15 chairs high on a stacking trolley.

Dyed-through polypropylene shell available in basic dark, white, ivy, ice grey, brick, warm grey, chocolate, and orange. See swatches for indications of shades.

Choice of glides for carpet or hard floors.

White and black shell available on a Quickship lead time of 2-3 weeks.

Dimensions
47w x 49d x 43/79cmh
