

# Standard Chair SP

Jean Prouve, 1934

## Description

**Standard Chair SP** by [Jean Prouve](#) for [Vitra](#).

Chairs take the most strain on their back legs, where they bear the weight of their user's upper body. Prouvé took this into account very succinctly in Standard Chair. Tubular steel piping is enough for the front legs that take relatively little strain, whereas the back legs are made of voluminous hollow sections and pass the strain on to the floor.

Standard SP (Siege en Plastique) brings the iconic chair up-to-date without changing anything about its form; a seat and backrest of robust plastic in a carefully chosen colour palette gives Standard SP a contemporary look. The plastic parts can be combined in various colours and easily switched out or replaced. To match the plastic surface, the bases feature a resistant, matt powder-coating.

Base in round and moulded sheet steel, powder-coated with a fine texture in Japanese red, deep black, basalt, chocolate, coffee, ecru or mint shades. See swatches for details.

Seat and backrest in ASA plastic (fine textured), available in deep black, warm grey, basalt, marron, olive, teak brown and citron. See swatches for details on the available options.

Select from standard glides for carpet or felt glides for hard floor.

## Dimensions

43.5w x 50d x 48/80.5cmh

## Product code

VIT21043600\*

## Delivery

Made-to-order: 10-12 weeks

## Price

£435.00

## Shop

274/275 Upper Street London N1 2UA  
Monday to Saturday 10am to 6pm  
Sunday 11am to 5pm T 020 7288
