

HAL Ply Tube stackable chair

Jasper Morrison, 2012

Description

HAL Ply Tube stackable chair by [Jasper Morrison](#) for [Vitra](#).

With HAL, Jasper Morrison has created a new interpretation of the multifunctional shell chair, as well as a broad chair range with a distinct, contemporary look. The shape of the HAL shell provides plenty of freedom of movement and is slightly yielding to permit a number of seating positions - including sideways and astride - to ensure a dynamic and ergonomic posture.

The variety of bases, materials and colours in the HAL range enable a range of possible combinations that can be used for many different purposes both in the office and public spaces as well as at home.

Stackable four-legged tubular steel base available in chrome-plated finish. Up to six chairs may be stacked on the floor; up to 15 chairs may be stacked on a stacking trolley.

Plywood seat shell with wooden veneer. Light oak, Dark oak and Black pigmented walnut finishes available.
