

Heavy pendant light

Benjamin Hubert , 2008

Description

Heavy pendant light by [Benjamin Hubert](#) for [Decode](#).

The Heavy Light encapsulates a material focused approach to the design process, a signature of Benjamin Hubert's work. As one of his first collaborations, the Heavy Light was designed to push the potential of what is typically an industrial material, as well as challenge perceptions of inherent value.

Developed in close collaboration with a specialist producer in East Germany, it is illustrative of the perfect balance between innovative manufacture and visual simplicity. Each concrete shade is individually slip-cast and left inverted in the mould to dry for a number of days. During this process random air pockets and veining develop on the interior of the shade. These markings vary from one shade to the next and create unique and irregular marble-like patterns, which contrast with the shade's smooth exterior.

Shade available in white, brown, light grey or dark grey cast-concrete. Red braided cable with brushed steel ceiling rose or white braided cable with white steel ceiling rose.

Dimensions:
28.8dia x 23.5cmh

200cm drop height as standard. Longer lengths available upon request.

Bulb:
E27 ES (A60 LED) Max 60W
