

Tip Ton UV chair

Barber & Osgerby, 2011

Description

Tip Ton UV chair by [Barber & Osgerby](#) for [Vitra](#).

Plastic UV-resistant chair with a forward-tilt action which is particularly suited to use outdoors. Its name refers to the two types of sitting experiences that characterise the chair - from a normal position, Tip Ton can be tilted a few degrees forward where it then stays in place. The forward-tilt sitting position, until now the preserve of mechanical office chairs, straightens the back and improves circulation.

Tip Ton is made of polypropylene and is manufactured from a single mould without the use of mechanical components. This makes it extremely durable and 100% recyclable.

The Tip Ton chair is stackable. It can be stacked up to 4 chairs.

Available in basic dark, white, ice grey, basalt, glacier blue, olive, industrial green, and mango.

The chairs are UV-resistant and suitable for outdoor use.

Note: special additives prevent the fading of colours due to UV radiation. However, the chair may fade over time if exposed to prolonged periods of sunlight. We recommend limited exposure to sunlight.

Dimensions:

50.9w x 55.5d x 46.2/96cmh

Product code

VIT44023000

Delivery

Made-to-order: 6-8 weeks
