

Belleville chair

Ronan & Erwan Bouroullec, 2015

Description

Belleville stackable chair by [Ronan & Erwan Bouroullec](#) for [Vitra](#).

Named after the Paris quarter where Ronan and Erwan Bouroullec's studio is located, the Belleville collection is a streamlined and technically sophisticated family of chairs and tables inspired by the classic furnishings of the typical Parisian bistro or cafe.

At once characterful and restrained, Belleville chairs and tables are perfectly suited to domestic interiors and contract settings alike.

The Belleville Chair consists of a structural frame and a seat shell which is available in a variety of different finishes. The elegantly linear black frame is made of injection-moulded polyamide and is available with or without armrests.

The shell is available in injection-moulded polyamide in deep black, cream, basalt, sea blue or moss grey. A moulded plywood shell is also available in natural dark oak, natural oak, or black ash moulded plywood with a natural protective varnish. The full range of colours for the plastic or wood shells can be viewed on the downloadable spec sheet.

Alternatively, the chair shell may be covered in Twill fabric or Leather Premium from Vitra's fabric and leather collections. See the downloadable sample sheet for the full range of colours and materials available.

Fitted with plastic glides for carpet, or felt glides for hard floors.

The plastic and wood side and armchairs are stackable up to six chairs; fabric and leather versions are not recommended for stacking.

Dimensions: 55w x 50d x 47/83cmh
