

Grow greenhouse

, 2015

Description

Grow greenhouse by Caroline Wetterling for [Design House Stockholm](#).

Made of handmade glass, the Grow miniature greenhouse provides the perfect environment for seedlings or tiny plants. The bottom part of the two-part glass container holds the soil and the plant, while the upper part protects the plant and also has a small spout which enables it to be used to water the plant with ease.

The spout in the lip of the upper section also helps to admit air to the mini-greenhouse and regulates moisture and temperature levels within.

Available in small and large size.

Dimensions
8dia x 14cmh
12dia x 24cmh
