

Shimmer console table

Patricia Urquiola, 2015

Description

Shimmer console table by [Patricia Urquiola](#) for [Glas Italia](#).

Glas Italia has enlisted a roster of internationally renowned designers to create striking new furniture that marries progressive design with a heritage and tradition of master craftsmanship in glass.

The Shimmer family of tables are made from extra-light glass finished with a highly specialised polychromatic coating allows each piece to reflect an array of subtle colour variations across their surface.

This striking iridescent effect, which varies continuously depending on the angle of light and the vantage point, gives the Shimmer range its name.

Please note that the production process generates a unique finish for every table, meaning that variations in colour and texture are part of the essential character of each piece.

Shimmer tables are available in transparent glass or opaque glass.

The Shimmer console leans against a wall with single leg set at an angle. The table leg is made of the same glass as the table top with a rounded form that lends a sense of great lightness.

Also available as a [side or coffee table](#).

Dimensions:
100w x 45d x 84.5cmh
