

Orbit mirror

Rodney Kinsman, 1981

Description

Orbit mirror by [Rodney Kinsman](#) for [OMK 1965](#).

A classic of 1980s British design, the Orbit mirror combines a large wall-mounted circular mirror with a smaller vanity mirror positioned on a swing arm much like a satellite orbiting a planet.

The vanity mirror has both a regular reflecting and a magnifying surface, and can be swivelled through 180° to offer views of the back or side of the head and enable 360-degree grooming.

Combining a striking presence with practicality, this enduring design has been employed in both domestic and contract settings.

Toughened mirror glass supported on a steel box frame with a tubular steel swing arm.

Frame is available powder-coated black or white, or in an electrostatic-plated chrome or bronze finish.

Dimensions

86w x 70d x 55cmh

Please note: due to the fragile nature of this design we are unable to offer international shipping.
