

Non Random pendant light

Bertjan Pot, 2009

Description

Non Random pendant light by [Bertjan Pot](#) for [Moooi](#).

The Non Random light is made in opposition to the Random light in that the resin yarn making the translucent shade is applied in a very organised way around its oblong support, creating a light criss-cross pattern.

The Non Random light is as much a sculpture as it is a suspension light. It brings softness and some magic to any interior.

The Non Random light is another classic piece of lighting from the Random family typified by its powder-coated aluminium shade.

Reflector in forced aluminium. Epoxy drained fibreglass. Available in two sizes. Black and white.
