

# Arrangements 17S

Michael Anastassiades, 2018

## Description

**Arrangements 17S** by [Michael Anastassiades](#) for [Flos](#).

Inspired by the parallels between lighting and jewellery, Arrangements is a modular light system where geometric light elements can be configured in a variety of unique compositions. Each unit attaches to the previous one, gracefully hanging as part of a growing chain.

Michael Anastassiades explains, "I'm challenged by how the delicate nature of something small can be translated spatially and still manage to retain its preciousness in the way materials are presented. It is no coincidence that the word 'pendant' has a double meaning. Existing both as a piece of jewellery that hangs from a chain worn around the neck, and a light designed to hang from the ceiling".

Part of the Arrangements series, this minimalist and sculptural pendant is comprised of the following elements: small rose, round small and round medium.

Made of aluminium and finished in painted matt black.

2.5m cable included.

Please see the different elements [here](#) and [contact us](#) if you need help designing your ideal lighting composition.
