

# System Ultra - Shelves

Poul Cadovius, 1957

## Description

**System Ultra rails** by [Poul Cadovius](#) for [DK3](#).

Following the design of the iconic Royal Shelving system, Poul Cadovius created the System Ultra in 1957. It was developed as a space-saving storage solution, with the same innovative notion to move furniture from the floor and onto the walls to create a more spacious room.

The System Ultra comprises wall-mounted rails, shelves and hangers in powder-coated steel. The slim shelves feature an elegant wave-shaped edge profile and attach to the rails with hangers in either brass or coloured steel.

The components are available in a variety of colours and sizes, allowing flexibility to create your desired configuration and to expand or reconfigure in the future.

The shelves are available in three sizes and the following colours: black, white, sand grey and green.

Hangers come in the corresponding sizes and are available in brass, black, white, sand grey and green.

Rails are sold separately [here](#).

If you require any assistance designing your shelving system please either [contact us](#).
