

To Go Tumbler

Description

To Go Tumbler by [Kinto](#)

Designed in Japan, the To Go Tumbler is an elegant and eco-friendly way to enjoy your coffee on the go. The minimalist design is vacuum insulated, the inner foil layer reflecting heat back inside, retaining the temperature of hot or cold drinks.

Available in a tranquil colour palette with matte finish, the tumbler is made from high-quality stainless steel which retains the rich flavour of your drink. Practically designed, the interior is electro-polished to prevent stains and odours, while the rounded bottom prohibits residue build-up, making the tumbler easy to clean.

To Go features a transparent lid, the drinking hole created to control the momentum of liquid, while the smooth tumbler rim allows for a comfortable drinking experience without the lid.

The compact design is not only stackable but has been specifically created to fit espresso machines, coffee makers and car cup holders.

Please note: Do not use in the microwave. Dishwasher safe.

Dimensions:
8.6dia x 12.8cmh

Capacity:
360ml/12oz

Upper-temperature tolerance:
100°C/212°F
