DESCRIPTION

One of Marcel Gascoin's most well-known pieces, the C-Chair Dining Chair, was designed in 1947. The chair represent not only the aesthetic and practical power of Gascoin's designs, but also the social conscience he strongly demonstrated through the post-war years in France. The C-Chair was originally created out of necessity to fit in to the new sizes of homes build at the end of World War II, where Gascoin made up for the lack of space by creating simple, functional furniture. Cleverly designed with great attention to detail, the C-Chair possesses an elegant shape yet sturdy construction rooted in a simple, minimal and strong design language. Characterised by voluminous and vigorous legs juxtaposed by an inviting seat in lighter material like cane, straw or fabric, the quality of the C-Chair reveals itself through modern lines, sobriety and high-quality wooden workmanship.

VERSION - FULL-UPHOLSTERED - VENEER - CANE

RAL codes are indicative.

- Upholstered in fabric/leather/ Oak
- Upholstered in fabric/leather/ Blackstained Oak // - / gloss 20
- Upholstered in fabric/leather/ Brown/Black Stained Oak // - / gloss 10
- Upholstered in fabric/leather/ Oiled American Walnut

FABRIC CONSUMPTION

Seat: 140 cm x 0,63 m

Back rest: 140 cm x 0,46 m

CLEANING AND MAINTENANCE

For cleaning the upholstered surface, first try to brush off the dirt gently. If this is not enough then vacuum the surface.

If further cleaning of the padding is needed, a stain remover is recommended. The cleaning has to be gentle and must always be tested on the most invisible area of the surface before the actual cleaning. Avoid blotches by gentle, circular rubbing towards the stain.

To avoid stains, quickly remove the dirt with a piece of absorbing household wipe and clean with water and colourless washing-up liquid.

Do not use the following products for the padding:

- Undiluted cleaning liquids.
- Bleach.
- Ammoniac.
- Soap for hard surfaces.

For dusting and light cleaning of the frame use a soft, dry cloth.

For further cleaning of the frame, use a soft cloth that is firmly wrung in clean water for gently wiping the surface, and then immediately use a dry cloth to wipe the surface again.

Do not use materials for maintenance that:

- Contain abrasive agents.
- Are basic, acidiferous or organic.

For the best maintenance of the product, protect it against sunlight and heat, and try to keep it away from moisture, grease and other dirt.

Furthermore, protect the surfaces against sharp objects and other that might scratch.

ENVIRONMENT

Parts can be separated and sorted for recycling.

Disposal of plastic type PP may be done with incineration of waste.
