

All wood is sourced from European well-kept and certified sources.

The wood is treated in hard wax oil, stain or lacquer.

The oil and stain brings out the natural character of the wood, while the lacquer gives a smooth one-color surface.

All leather is vegetable tanned from Swedish cattle, each with a unique appearance.

Natural marks, such as mosquito bites and color variations is a part of the naturally tanned leather and a certificate of a product of nature.

Soft upholstery leather is used for all padded seats, and hard tooling leather for beekrests and flat unpadded seats.

Due to the difference in the tanning process, there is a variation in color and structure between upholstery leather and tooling leather.

COLOR COMBINATIONS

Natural leather
(9101/8800)
Ash white oil

Dark brown leather
(9208/8678)
Dark brown stain
Beech

Black leather
(9110/8175)
